17:00 Introduction
(16:00 / 15:00)

17:15 Tsubasa KAWAI

Genetic and functional analysis of compensatory
growth of lateral roots in rice

Nagoya University and University of Western Australia, 3rd year PhD student

17:45 Thanachok TATICHAROEN

Experience of come across comfort zone in experiment: From
plants physiology to molecular genome editing by CRISPR/Cas 9
system

Nagoya University and Kasetsart University, 2nd year PhD student

18:15 Q&A Session on the Joint PhD program

About the Joint PhD Program

The Graduate School of Bioagricultural Sciences currently has two Joint PhD Programs, which allow students to obtain a PhD degree, issued by both Nagoya and our partner universities. The students will spend time in both countries, with unique opportunities for joint research and cultural exchange.

The International Collaborative Program in Agricultural Sciences between Nagoya University and Kasetsart University, was established in 2017. KU is Thailand's oldest agricultural university and one of the largest universities in the country. It offers a wide range of research topics in life science, with a particular strongpoint in agriculture.
