Group discussion

About the Post-SDGs Program

Nagoya University and Gifu University have been selected for the 5-year Project for Inter-University Exchange Project "Developing professionals who can work autonomously and collaboratively to contribute to economic security in a post-SDGs world (Post-SDGs)" from 2022. Under this project, we will conduct student-based educational and research exchanges with the University of Western Australia, Monash University, the University of Queensland, and the University of Adelaide, which belong to the top eight university groups in Australia, as well as with academic partner universities in Asia.

This student symposium will present the results of each training program in Post-SDGs, as well as educational lectures and workshops.
